

ENTRYPPOINT

Global Visa Document Readiness Platform

AI-powered document analysis, readiness scoring, and human oversight — so travelers know exactly what's missing before they apply.

React · TypeScript · FastAPI
Supabase · DeepSeek V4 Pro via Fireworks AI

The Problem

Travelers lack one integrated place to:

- Understand visa document requirements for their route
- Verify the documents they already hold
- Fix problems before travelling — not after rejection

This gap costs time and money and can contribute to unsafe or irregular migration when people cross borders without required documentation.

EntryPoint's answer:

An earlier, practical readiness check

So that applicants can prepare with confidence
— before an application or border crossing.

What EntryPoint Does

One platform for applicants and administrators

Create Applications

Select origin, destination, and visa type to load the correct checklist.

Upload & OCR

Drag-and-drop documents; browser OCR extracts text on the spot.

AI Document Analysis

DeepSeek classifies each document and flags issues or missing data.

Track Readiness

A live readiness score shows exactly what's passed, missing, or flagged.

Ask for Help

Applicants query an advisor directly when the AI can't resolve something.

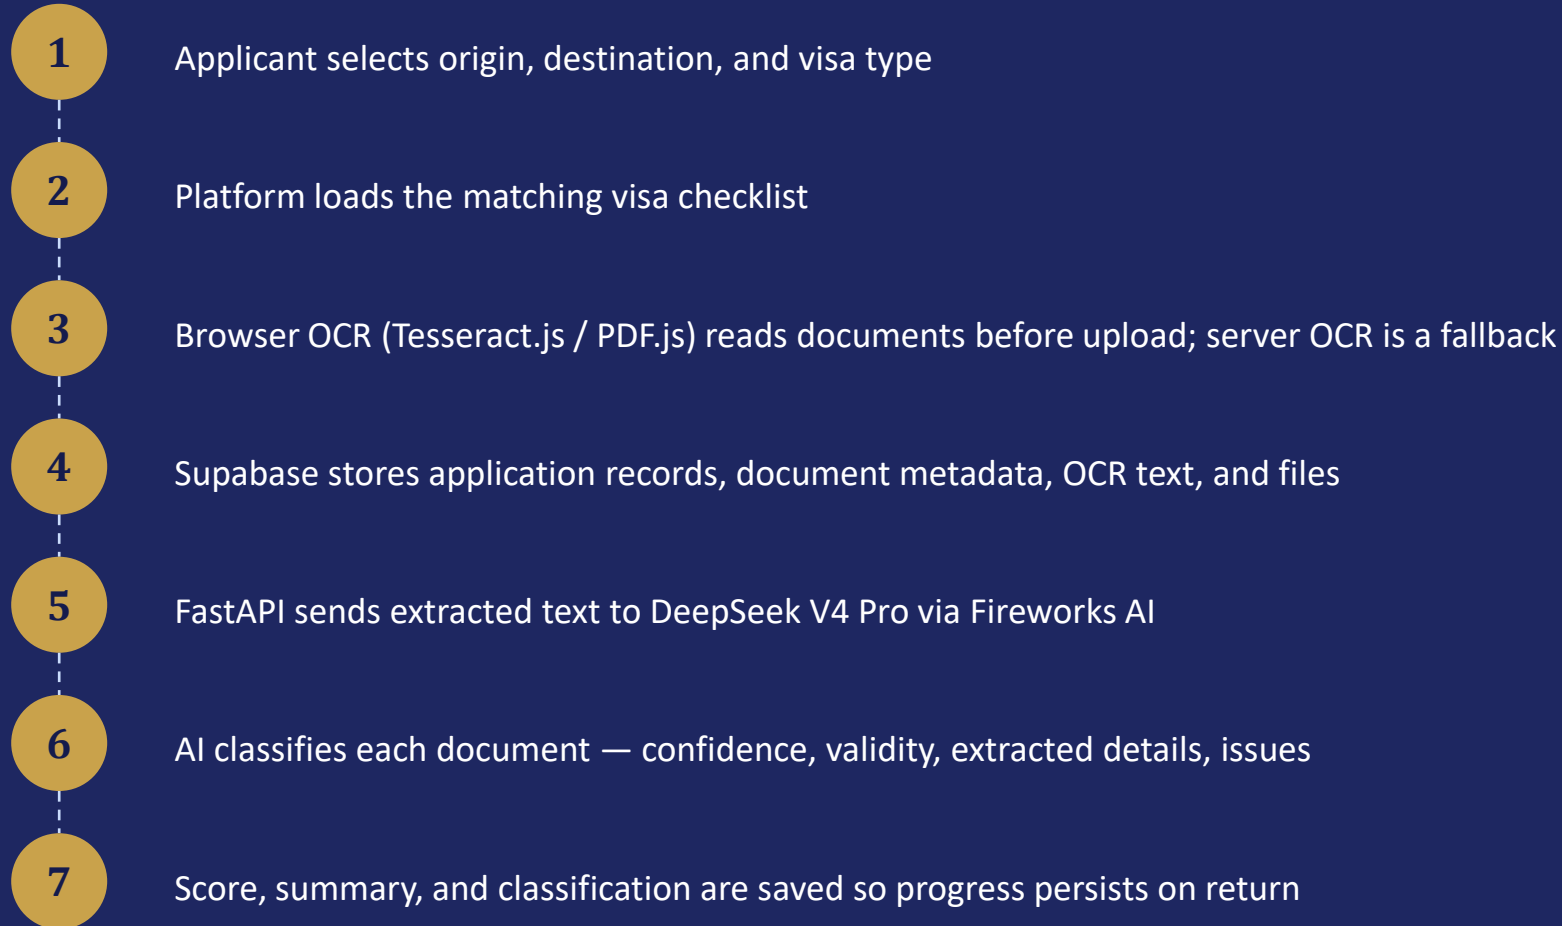

Admin Oversight

Administrators manage requirements and resolve applicant queries.

System Flow

From country selection to a saved AI-scored readiness result

Under the Hood

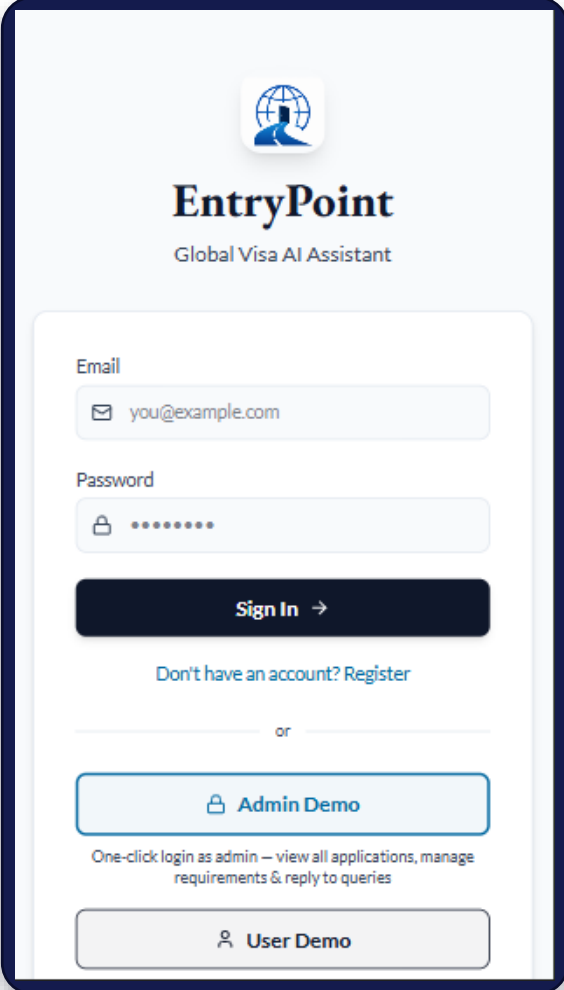

Services and technologies powering EntryPoint

Area	Service / Technology	Purpose
Web app	React, TypeScript, Vite	Applicant and administrator interface
Styling	Tailwind CSS	Responsive UI
OCR	Tesseract.js, PDF.js, Tesseract, Pillow	Browser and server text extraction
API	Python, FastAPI, Uvicorn	Application, document, analysis, query API
AI	DeepSeek V4 Pro via Fireworks AI	Document classification and analysis
Data	Supabase PostgreSQL	Users, applications, requirements, queries, AI results
File storage	Supabase Storage	Uploaded document files
Auth	Bcrypt, Custom Tokens	Applicant and administrator access
Hosting	AMD Cloud, Docker	Deployment runtime

Login & Instant Demos

Frictionless entry for applicants and judges alike

- Standard email/password sign-in with registration
- One-click Admin Demo — view all applications, manage requirements, reply to queries
- One-click User Demo — experience the applicant journey instantly
- Removes the barrier of account setup for evaluation and onboarding

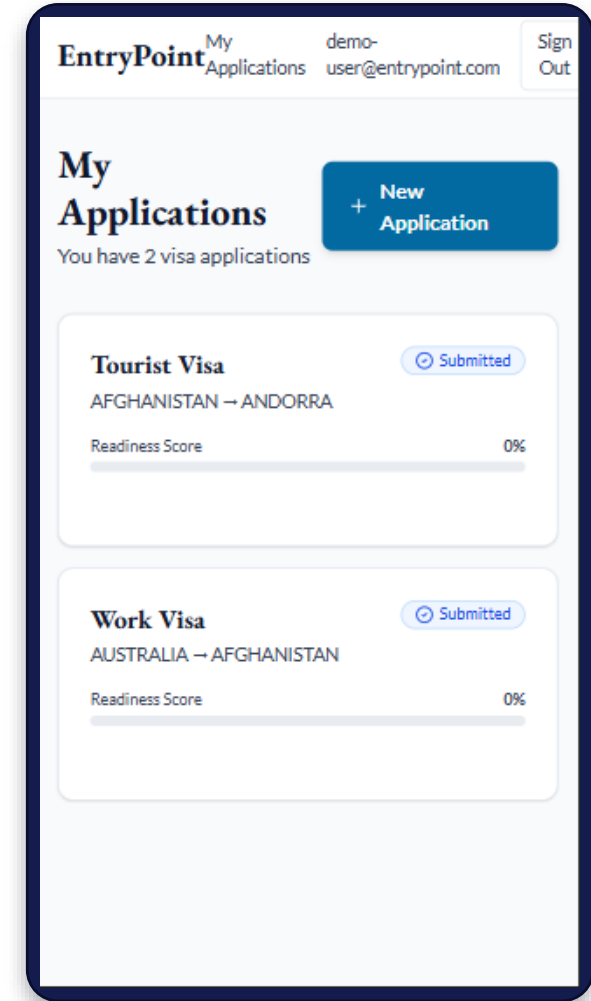

The screenshot displays the login page for the EntryPoint Global Visa AI Assistant. At the top, there is a logo featuring a globe with a blue path leading to a person icon, followed by the text "EntryPoint" in a bold, dark blue font, and "Global Visa AI Assistant" in a smaller, lighter blue font below it. The main login area is enclosed in a light gray rounded rectangle. It contains an "Email" field with a placeholder "you@example.com" and an "Email" label above it. Below the email field is a "Password" field with a placeholder of eight dots and a "Password" label above it. A dark blue "Sign In →" button is positioned below the password field. Underneath the button is a link that says "Don't have an account? Register". A horizontal line with the word "or" in the center separates the standard login from the demo options. Below this line are two buttons: a blue "Admin Demo" button with a lock icon and a gray "User Demo" button with a person icon. Below the "Admin Demo" button is a small text description: "One-click login as admin — view all applications, manage requirements & reply to queries".

Applicant Dashboard

Every application and its live readiness score, at a glance

- Lists all of the applicant's visa applications
- Shows route (origin → destination), visa type, and submission status
- Readiness score progress bar per application
- One tap to start a New Application

New Application Wizard

Origin, destination, and visa type drive the whole checklist

- Step 1 of 2: searchable origin and destination country pickers
- Visa type selector — Tourist, Work, Study, Permanent Residence, Asylum Seeker
- Selections determine which requirements load next
- Clear progress indicator keeps the applicant oriented

Requirements & Readiness

A live checklist tailored to the applicant's route and visa type

- Readiness score starts at 0% and updates as documents are analysed
- Every requirement listed — passport, application form, photo, sponsorship letter, and more
- Missing items are flagged clearly in red until resolved
- An in-app query box lets applicants ask an advisor questions directly

Upload & Browser-Side OCR

Documents are read before they ever reach the server

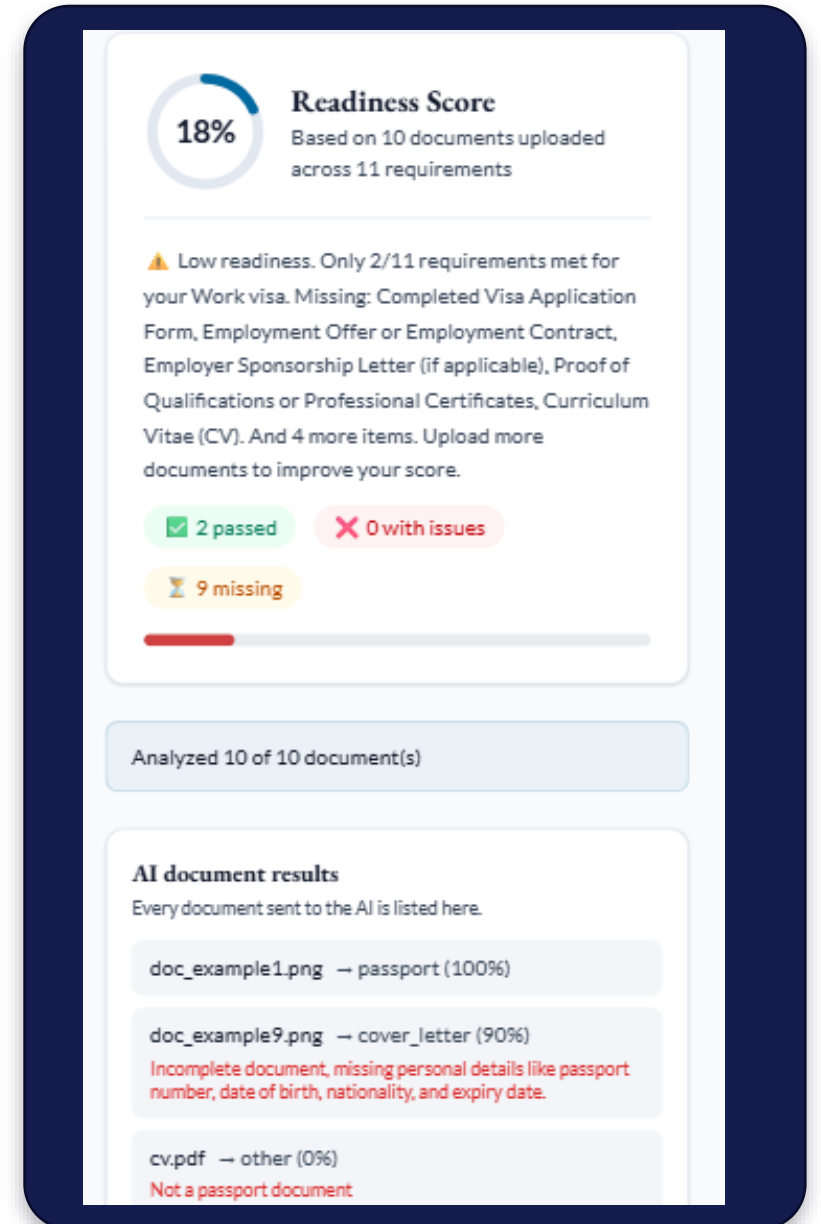

- Drag-and-drop or multi-file selection — PDF, JPG, PNG
- Tesseract.js/PDF.js extracts text in the browser, shown as a live OCR confidence % per file
- The AI auto-classifies and matches each file to the right requirement
- Applicants can review and remove files before committing the upload

AI Document Analysis

DeepSeek V4 Pro scores every document, not just a pass/fail flag

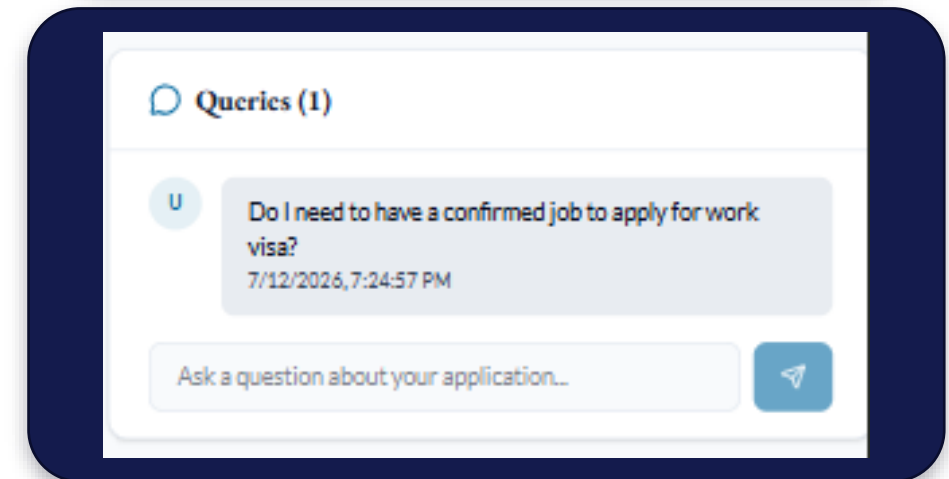

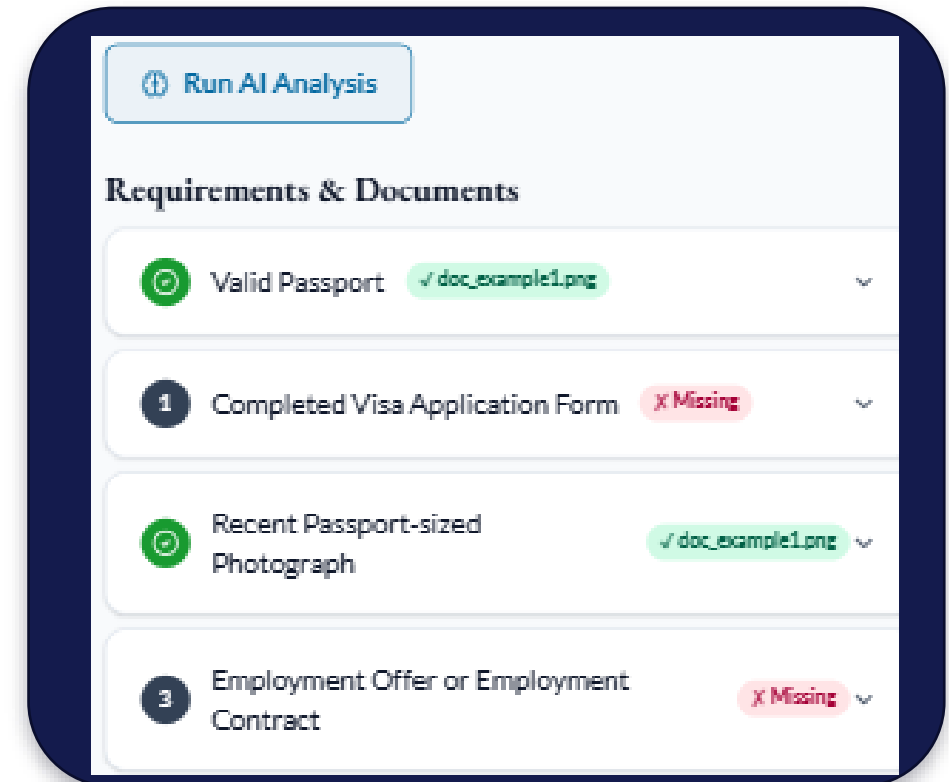

- Readiness score recalculates after analysis — passed / issues / missing counts
- Per-document verdicts with a confidence percentage
- Specific, actionable issues — e.g. wrong document type, missing passport number, missing dates
- A plain-language summary of what's still needed to reach full readiness

Requirement Matching & Applicant Queries

Every checklist item links to its matched file — and a direct line to an advisor

- Matched requirements show a green check and the linked filename
- Still-missing requirements stay flagged in red for quick follow-up
- Applicants can ask a free-text question about their application
- Queries are timestamped and routed straight to the admin queue

Admin Panel: Human Oversight

Because visa decisions deserve a person, not just a model

- Unanswered applicant queries surfaced with route and timestamp
- Admins reply directly, resolving the query in place
- Requirements are fully manageable per visa type — add, edit, delete
- Requirement scope can target specific countries or apply to all

The screenshot shows the 'Queries' tab in the Admin Panel. It displays a list of 'Unanswered (1)' queries. The query is from 'demo-user@entrypoint.com' for a 'Work' visa to 'ANTIGUA AND BARBUDA', received on '7/12/2026, 7:24:57 PM'. The query text is 'Do I need to have a confirmed job to apply for work visa?'. Below the query is a text input field with the placeholder 'Type your reply...' and a 'Reply' button.

Applications	Queries	Requirements	Users
Unanswered (1)			
demo-user@entrypoint.com · Work → ANTIGUA AND BARBUDA 7/12/2026, 7:24:57 PM			
Do I need to have a confirmed job to apply for work visa?			
Type your reply...			
<button>Reply</button>			

The screenshot shows the 'Requirements' tab in the Admin Panel. It displays a list of requirements for a 'Tourist' visa. The requirements are: 'Valid Passport', 'Completed Visa Application Form', 'Recent Passport-sized Photograph', and 'Proof of Sufficient Financial Means'. Each requirement has an 'APPLIES TO' dropdown set to '[ALL]' and 'Edit' and 'Delete' buttons.

#	REQUIREMENT	APPLIES TO	EDIT
0	Valid Passport	[ALL]	Edit Delete
1	Completed Visa Application Form	[ALL]	Edit Delete
2	Recent Passport-sized Photograph	[ALL]	Edit Delete
3	Proof of Sufficient Financial Means	[ALL]	Edit Delete

Designed With Human Oversight

The AI shows its confidence, not just an answer — anything uncertain routes to a person before it affects a real application.
